

Requirements

- Name:
Sheesha Finance (sheesha.finance)
- Symbol:
SHEESHA
- Decimals:
18
- Total Supply:
100,000 SHEESHA tokens
- Which token would be vested?
SHEESHA
- How soon can the person unstake?
Anytime, Unstaking fee of 4%.
- Can a person stake/unstake the token directly on UNISWAP?
Staking and unstaking done Via our website interface connecting to Metamask.
- Cap for LGE which use ETH if cap by ETH or only time duration for LGE
No cap. Time duration only
- Will the founder's/dev wallet be a smart contract or a normal eth address?
Ideally, it should be eth address
- Re confirmation- Coin for initial staking, ETH?
Only ETH
- Re confirmation- Trading not allowed, right?
SHEESHA tokens will be tradeable.
- Re confirmation- Only transfer of tokens would be there, right?
Yes both SHEESHA and LP tokens.
- Will be creating liquidity pairs after LGE directly on UNISWAP?
Or will it be through the smart contract?- Smart Contract for LGE
Same as CORE LGE
- Will there be any rewards for staking?
LP token staking will be rewarded from the respective bucket.
SHEESHA token staking will be rewarded from the respective bucket.
- Will vesting be manual or automatic (through smart contract)?
Automatic via smart contract

Changes dated 29 Dec 2020

15% team (4% monthly unlock over 25 months)

10% dev

10% marketing

15% liquidity provision

10% SHEESHA staking rewards

20% LP rewards

20% Reserve

ETH from LGE will be used in full and paired with 15,000 SHEESHA tokens on Uniswap.

LP tokens created from LGE will be auto staked on platform and locked.

0.3% (both ETH and SHE0- 0.15% of each) Uniswap LP fees: ETH to be used for buyback and SHEESHA for LP rewards.

Unstaking of LP tokens will send back the LP token to the ETH wallet that contributed to the LGE after tax.

1. Process should be manually triggered.
2. Anybody should be able to trigger this function, or the function triggers when a threshold is reached.
3. This allows for LP fees to go to Treasury contract.
4. Uniswap fees can be accessed manually and staking can be adjusted during the manual process.

After unstaking, users can remove liquidity directly on Uniswap.

Unstaking LP tokens subject to below tax schedule over 24 month period as follows:
1st month 96% tax, 2nd month 92% tax, 3rd month 88% tax and tax reduces by 4% monthly until month 24 onwards where it will be fixed at 4%.

Unstaking SHEESHA tokens subject to 4% tax. Out of that 3% will go towards SHEESHA staking rewards and 1% of it will go to burn address.

- Burn address: [0x00](https://etherscan.io/address/0x00)

February 8 Discussion:

1. Staking/Unstaking of LP token after the LGE

Phase 1 Roadmap:

Lottery – Users buy tickets using SHEESHA tokens. 95% of total SHE collected to be distributed to winning tickets similar to pancakeswap. 5% of SHEESHA collected will go to burn address.

NFT – Reserve tokens to be used to fund quality Sheesha NFTs.

Other project tokens – Use reserve tokens to swap with other project tokens. OPTs will be added to SHEESHA staking rewards as bonus to increase total APY. OPTs also to be rewarded to LP stakeholders.
